

Simple Grouping

Horizontal group (2 images)

Vertical group (2 images)

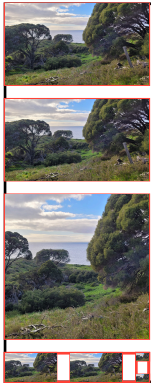

Nested Grouping

Nested (horizontal top)

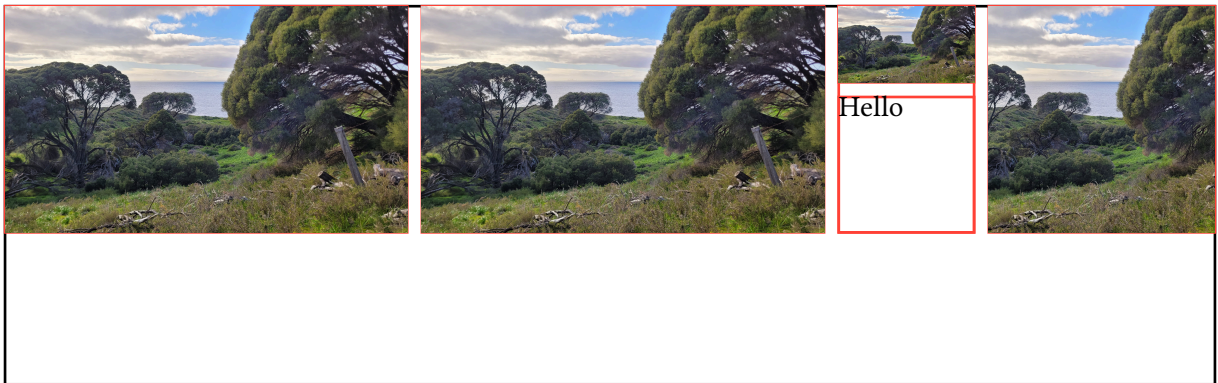

Nested (vertical top)

Specify Layout with Tree Structure

Manual tree construction

display-content-tree helper function

Constant-size Elements

Constant-width in horizontal row ($a=0$, constant-size=1cm)

Constant-height in vertical stack (a=0, constant-size=2cm)

Multiple constant-width elements in horizontal row

Image with constant offset

Stretchable Elements

H-stretchable: text absorbs leftover width in horizontal row

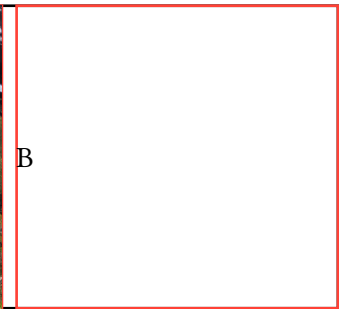

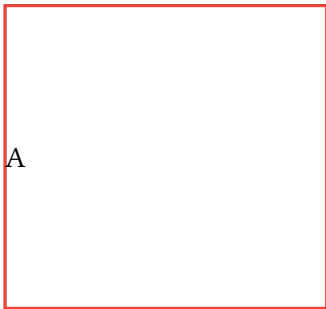

V-stretchable: text absorbs leftover height in vertical stack

Stretchable element in *vertical*
stack takes up leftover *height*

Two stretchable elements share leftover width equally

Stretchables in a nested layout

Stretching along the horizontal/vertical direction only works if ALL elements in the row/column are stretchable.

No horizontal stretching is applied as the first row is not stretchable

Same rules apply for vertical stretching
